

## Antimicrobial Casino Chip NOVA GUARD CHIP PROTECT

Available with all MATSUI Chips across the range with or without a decal and including Premier Decal Chips.

NOVA GUARD CHIPS have a silver based antimicrobial agents added at the production stage that is effective against a broad spectrum of microbes.

Registered at SIAA (Society of International sustaining growth for Antimicrobial Articles, Japan), the antimicrobial agent is extremely safe and USFDA approved for use.

NOVA GUARD CHIPS have been laboratory tested for their effectiveness at disabling a variety of Bacteria and Viruses

- \* The same weight, feel and colours as standard Matsui Chips
- \* Effectively enhances the antimicrobial power of silver against a variety of microbes
- \* The same antimicrobial agents are widely and successfully applied to everyday household items, sports equipment, toys and textile products.
- \* Reduces the amount of cleaning required compared to standard gaming chips.
- \* Does not required to be cleaned by potentially damaging cleaning products like sterilizing with antiviral sprays or Ultraviolet Sterilizers.
- \* Additional reassurance for Casino staff and Customers that Bacteria and Viruses cannot live on the Chip or Decal surfaces.
