

MG EYE ***Chip Authentication***

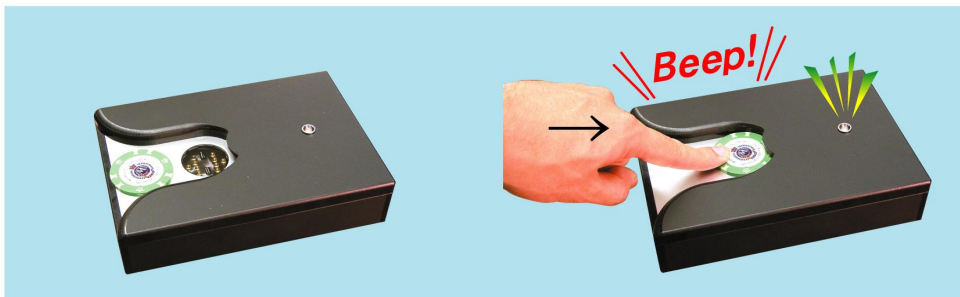

**Unique implanted prints creates
a gaming chip 100% proof.**

MATSUI

MG EYE

How it Works

Recently developed unique prints and implanted into the decal of the chips.
Chips are placed into the Chip Authentication reader and an alarm/light will activate to distinguish between real and fake chips.

No changes are made to the manufacturing time ensuring all chips are delivered at Matsui exceptional lead time.

Unique implanted prints creates a gaming chip 100% copy proof.

Inexpensive “MG EYE-SP” readers can be placed on live gaming table as well as cashier desks and security offices.

“MG EYE-MB” compact mobile readers with rechargeable batteries can be used anywhere on the gaming floor.

Able to be used conjunctively with Secur-e-chip anti-theft system.

Please contact sales staff in your area for further details.
